Brand New Book ***** Print on Demand *****.Evidence-based research gleaned from respected institutions, media reports, and the hallways of our nation s schools all point to the same truth: Bullying has devastating effects. Just a quick look at statistics reveals the depth of the problem: -- Analysis of high-profile school shootings such as Santana, Columbine, and Virginia Tech reveals that that up to 71 percent involved attacker(s) who felt bullied, persecuted, attacked, or injured. --Around 160,000 school children stay home from school each day out of fear, often without telling their parents why. -- Children targeted by bullies experience higher than normal levels of insecurity, anxiety, depression, low self-esteem, and physical and mental symptoms. -- Adults who were bullies as children have higher rates of substance abuse, domestic violence, and other violent crimes. -- The percentage of students who report being bullied rose 50 from 1983 to 2003. In short, bullying is an act that cannot be ignored if we are to safeguard our nation s schools and young people.
