Createspace Independent Publishing Platform, United States, 2016. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Separated from your team. GPS, dead. Safety awaits at the rendezvous point, but to get THERE you must figure out HERE. The first book in the Channelized Terrain Tactics (CTT) series is a navigation primer written to assist the user to learn and refresh the skills needed for land navigation with map and compass. Channelized terrain is rugged. Unforgiving. Disorienting. Its encountered worldwide, formed by plate action and erosion. It steers you--channels you--through its own route whether you are walking on a ridge top, river valley, or along the irregular ground in between. A GPS might not function here, and keeping pace is sometimes not realistic due to switchbacks. Analysis of core land nav techniques resulted in the creation of a focused guide using practical walk through examples, and serves as a valuable training aid and refresher. With years of experience contained in every page, CTT guides the reader through tools and rigging, conducting a resection, and interpreting terrain. The art of conducting a resection is becoming as lost as weekend hikers in Nepal. A resection combines use of a compass, practical knowledge of how a cartographer made your map, the relationship between map and compass, and the ability to read terrain contour. To conduct a resection in the field requires many small calculations and applications while dealing with distractions, different metrics, reduced visibility, and possibly nagging doubts. As a training reference, this book was written for people engaged in Search and Rescue (SAR), military and security operations, those preparing for special selection courses, police and federal authorities, hunters, and travelers who veer from the beaten path. This book strives to be a valuable reference...
